

Week 3 — The Through-Line

Map Content & CTAs

Muhammad Ayyan Hassan

Portfolio content architecture · claim · CTA journey · proof gaps

DELIVERABLE

One-line claim + content map + CTA ladder + still-need-to-gather list

Locked direction: security-focused, evidence-led, and deliberately concise.

The statement a visitor should remember

I find and exploit vulnerabilities in web applications, document the evidence, and explain why they matter — using AI as an analytical partner, not a shortcut.

Why this claim works

- It is a single, memorable sentence rather than a paragraph.
- It communicates hands-on security work, evidence, and reasoning.
- AI is positioned as an analytical partner rather than the substitute for the work.
- It supports the XSS and SQL injection case studies without making the claim dependent on one payload or one project.
- It creates a clear through-line from claim → proof → contact.

One portfolio structure, one visitor journey

The existing sitemap is preserved: Home → Work → About / Contact.

HOME

Purpose: Establish the claim and move the visitor toward evidence.

Sections in order: 1. Proof statement. 2. Who I am. 3. Featured work preview — XSS leads, followed by SQL injection. 4. CTA area.

Strongest proof: XSS leads because the documented pivot from a blocked `<script>` approach to a successful `img onerror` approach demonstrates adaptation and reasoning under constraint.

Primary journey CTA: See the work → Work

Secondary direct CTA: Email me → About / Contact

WORK

Purpose: Provide the evidence that makes the claim credible.

Sections in order: 1. Brief framing. 2. XSS case study — Scope → Method → Findings → Impact. 3. SQL injection case study — Scope → Method → Findings → Impact. 4. Security write-ups / supporting context.

Strongest work: Reflected XSS leads because the documented process shows a failed initial technique followed by a successful pivot, demonstrating problem-solving rather than only a successful result.

CTA: Interested? Let's talk → About / Contact

ABOUT / CONTACT

Purpose: Give a convinced visitor context and the lowest-friction path to contact.

Sections in order: 1. Who I am / background. 2. Email CTA. 3. GitHub. 4. LinkedIn. 5. Resume.

Primary CTA: Email me about internship or entry-level opportunities

One final action, reached deliberately

Primary action: Contact me by email about cybersecurity internship or entry-level opportunities.

Page	CTA	Next step
Home	See the work	Work / evidence
Work	Interested? Let's talk	About / Contact
About / Contact	Email me about internship or entry-level opportunities	Final action

Through-line: Understand the claim → See the proof → Become convinced → Contact me

Evidence gaps to resolve during the build

This list is intentionally honest. Missing or unverified evidence is not presented as completed work.

Proof item	Status	Where used	What is needed
XSS case study write-up	Ready	Work / XSS	Confirm final version.
SQL injection case study write-up	Ready	Work / SQLi	Confirm final version.
XSS exploitation screenshots	Needs verification	XSS findings	Confirm successful img onerror execution is clearly evidenced.
SQLi exploitation screenshots	Needs verification	SQLi findings	Confirm authentication-bypass evidence is clearly captured.
GitHub repository	Missing	Work + About/Contact	Confirm or create the portfolio-appropriate repository.
Live demo	Not currently available	—	Do not claim one unless available.
Quantified impact / before-after numbers	Missing	Case-study impact	No documented metrics currently available.
Testimonial / reference	Missing	About or case studies	No documented testimonial currently available.
Professional photo	Needs verification	About/Contact	Confirm whether a portfolio-ready photo exists.
Current resume PDF	Needs verification	About/Contact	Confirm the current portfolio-ready version.
FlyRank internship work samples	In progress	Work or About	Include only finished and documented work.
SafeLine attack-log evidence	Needs verification	Potential additional work	Verify evidence before including it.

Week 3 submission readiness

Requirement	Status	Evidence
One-line claim	PASS	Section 01
10 AI-generated options	PASS	Claim selection process completed before finalization
Final claim selected / sharpened	PASS	Section 01
Content map	PASS	Section 02
Every page mapped	PASS	Home, Work, About / Contact
Ordered sections	PASS	Section 02
Strongest work leads	PASS	XSS leads featured preview and Work
Named CTA per page	PASS	Section 02
CTAs ladder to Week 1 action	PASS	Section 03
Honest gather-list	PASS	Section 04
No invented proof	PASS	Unverified/missing items explicitly marked

NOTE:

The missing/verification items are future build tasks and are intentionally documented rather than presented as completed proof.
